

# IR35 Comply

IR35 Comply is PayStream's complete IR35 review service which enables you to manage IR35 throughout your supply chain, all via our market leading online portal.

Our innovative portal is quick and easy to use, shares information throughout the supply chain and is supported by our internal team of IR35 experts.

Also, if you're looking for insurance in respect of IR35 risk, several insurers are offering this but on the condition that an independent IR35 review is completed from an approved IR35 expert, such as PayStream.

## How does it work?

PayStream issue your contractors with a login to the portal where they complete and submit a detailed IR35 questionnaire.

PayStream's IR35 team assess the questionnaire responses and post the outcome online. Each case is supported by an IR35 Status Certificate and a Review Pack, which highlights and explains key factors of IR35.

Agencies have access to view their contractors IR35 Status Certificates and Review Packs. The reviews are stored on the portal and can be referred back to whenever needed.

The portal can be configured so that agencies & clients "sign off" on the IR35 statuses. Where information doesn't match the agency or client's understanding of a role, feedback can be raised via the portal to be reassessed by our IR35 team.

PayStream confirms IR35 status. Full audit trail of all assessments are available to download from the portal at any time by the recruitment business and the client.

If you want to ensure you are prepared for the off-payroll working legislation that is due April 2021, then talk to us today regarding IR35 Comply.
